

kp FlexiLid®

Flexible barrier top lidding films

kp FlexiLid® is our range of barrier top lidding films, produced with our best-in-class blown extrusion technology. Our unique films are specially formulated to be as thin as possible, whilst creating a superior seal in conjunction with rigid films and trays to maximise food preservation and extend shelf life. Available in a number of polymers to match your packaging requirements.

Packer/Processor Benefits

- Bespoke formulas
- Works with all sealing machines
- Lock seal, peelable and burst peelable options
- Maintains modified atmosphere
- Available in a number of polymers and thicknesses

Retailer Benefits

- Crystal clear shelf appeal
- Anti fog technology available
- Easy to print, laminate and brand
- Extends shelf life

Sustainability Benefits

- Min. 30% post-consumer recycled content option
- Recyclable options available
- Lightest and thinnest films on the market

kp FlexiLid®

Flexible barrier top lidding films

Using our world class technology, our team of packaging and technical experts have created a range of flexible barrier top lidding films to meet all of your fresh food requirements.

Recyclable options

Fully recyclable option kp FlexiLid® EH 145 R available. Certified by Interseroh and cyclos-HTP and designed following Ceflex guidelines for D4ACE PE mechanical recycling.

Post-consumer recycled content option

Alternative top lidding film options which use a minimum of 30% post-consumer recycled content, addressing eco-tax requirements.

Shrink

Our add-on shrink film technology allows our films to easily seal to a tray, creating a wrinkle free surface for secondary labelling and easy transportation or stacking without any distortion to the tray or pack.

Anti fog

Specially formulated to reduce haze and condensation inside the pack from modified atmospheres, ensuring optimum presentation and food preservation.

Printing

Easy to print for brand excellence and appeal, removing the need for additional labels.

Peel and seal

We offer a range of lock seal barrier lidding films for modified atmosphere packs as well as peelable options.

Sealing options: PET, PP, PE
