

kp FlexiFlow[®] EH 145 R

Recyclable barrier flow wrap film

kp FlexiFlow[®] EH 145 R is our recyclable barrier flow wrap film that delivers full protection while minimising plastic weight to reduce your packaging footprint. Use it as a standalone flow wrap solution or combine it with our recyclable PP kp Infinity[®] tray to create a recyclable combination all around. With this combination you get a flow wrap film and an award-winning tray together from one source.

Packer/Processor Benefits

- Bespoke formulas
- Designed for high-speed packing lines
- Hermetic lock seals through contamination
- High barrier (OTR < 5) for modified atmosphere packaging

Retailer Benefits

- Good optics
- Anti fog technology
- Easy to print, laminate and brand
- Extends shelf life

Sustainability Benefits

- Fully recyclable flow pack film in PE stream certified by Interseroh[®]
- Compliance with front of store collection where available*
- Full protection while minimising plastic >75%

*Easily sorted and recycled where the right infrastructure is in place.

Sustainable protection of everyday needs

kp FlexiFlow® EH 145 R

Recyclable barrier flow wrap film

kp FlexiFlow® EH 145 R is certified and validated by third party organisations as fully recyclable and is the perfect solution to protect food and reduce your packaging footprint. With more than 90% of PE, kp FlexiFlow® EH 145 R is well above the packaging guideline specifications.

High barrier

Extends shelf life, preserves quality and taste of product with outstanding optics in a high barrier film (OTR<5).

Anti fog

Specially formulated to reduce haze and condensation inside the pack from modified atmospheres, ensuring optimum presentation and food preservation.

Printing

Easy to print for brand excellence and appeal, removing the need for additional labels.

Operational excellence

Works with all FFS and vertical flow pack machines producing over 85 packs/min.

Fully recyclable

Fully recyclable top lidding film* is certified by third party organizations with more than 90% of PE which exceeds packaging guideline specifications.

Reduced packaging

Our flow wrap films work alone or with other substrates and use minimal plastic to protect your product and reduce food waste.

**Fulfills criteria of compatibility of the D4ACE guidelines for PE mechanical recycling

We produce plastics in rigid films, rigid trays and flexible films across **21 manufacturing sites in 14 countries worldwide**
