

# kp<sup>®</sup> ReClose

Reclosable PET rigid film

kp<sup>®</sup> Reclose is our range of multilayer PET rigid films for form, fill and seal and thermoforming food applications, like sliced cheese, that require a peel and reseal solution for improved consumer convenience and food waste prevention. It's an easy drop-in solution for PET form, fill and seal and thermoforming lines that is compatible with standard lock seal PE top lidding films.

Made with  
**Tray2Tray**

## Packer/Processor Benefits

- Reclosable up to 20 times
- Strong hermetic seal even through contamination
- Compatible with standard lock seal PE top lidding films
- Drop-in solution
- Allows for a reduction in packaging weight up to 12.5%
- Lower eco and national plastic taxes

## Retailer Benefits

- Crystal clear transparency and gloss
- Consumer friendly packaging
- Secure and leak proof
- High barrier option available for extended shelf life

## Sustainability Benefits

- Made with up to 75% post-consumer recycled PET, almost half (33%) coming from food trays
- Prevents contamination and reduces food waste
- Lower carbon footprint

# kp<sup>®</sup> ReClose

## Technical information

### Lower eco and national plastic taxes

Made with up to 75% post-consumer recycled PET, with almost half (33%) coming from food trays (kp Tray2Tray<sup>®</sup>). This can result in lower eco and national plastic taxes in countries (e.g.: France, Spain and United Kingdom), where the use of PCR PET from bottles and/or food trays is incentivised.

### Allows for a reduction in packaging weight up to 12.5%

kp<sup>®</sup> ReClose combined with lock seal PE top lidding films, such as kp FlexiLid<sup>®</sup> EH 373, allows you to reduce your packaging weight by as much as 12.5% compared to a combination of lock seal PET rigid films and repeelable PE top lidding films.

### Consumer friendly packaging

Designed to be easy to peel and reseal up to 20 times when the packaging sealing surface has a width of 5mm or higher.

### Drop-in solution

An easy drop-in solution that works with all standard PET thermoforming and form, fill and seal equipment, with no need to change or retrofit existing equipment.

### Secure and leak proof

The protection and safety of food contents are ensured by a best-in-class hermetic seal even through contamination and by full compliance with EFSA and FDA food contact regulations.

### Lower carbon footprint

Has a lower carbon footprint thanks to the use of up to 12.5% less plastic when compared with alternative packaging.
